		Capstone Report Rubric					
		Evaluator	Shane Slack		Date		12-13-24
Project	Laser Game	Team Members	Ale	Alex Wheelock	ock		
Criteria	5	4 - 1	0	Weight	Points Awarded	Score	Comments
Title Page	Title page is complete, with proper formatting that matches the rest of the report document	Title page is somewhat complete or formatting may not match the rest of the report document, may contain some errors	Title page is incomplete, improper formatting, contains multiple errors. Or section is not included or addressed	1	4.9	4.9	No page number on title page. Nice Laser!
Table of Contents	Table is complete and accurate, formatting matches the rest of the report document, all of the report sections are listed including page numbers	Table is somewhat complete. Some sections are missing and /or some page numbers have errors	Table is incomplete and inaccurate, formatting does not match the rest of the report document. Many sections are missing and/or page numbers may have errors. Or section is not included or addressed	1	5	5	Correct
Table of figures	Table is complete and accurate, formatting matches the rest of the report document, all of the report figures are listed including page numbers	Table is somewhat complete. Some figures are missing and /or some page numbers have errors	Table is incomplete, many figures are missing and /or page numbers have errors. Or section is not included or addressed	1	3.3	3.3	Pages are off starting with figure 10.7
Abstract	Adequately summarizes the project and the report contents. Contains no spelling or grammatical errors.	Briefly summarizes the project and the report contents, but misses some key details. Contains few spelling or grammatical errors.	Fails to summarizes the project and the report contents. Contains many spelling or grammatical errors. Or section is not included or addressed	1	5	5	
Background (history)	Adequately characterizes the history of the project. Contains no spelling or grammatical errors.	Briefly characterizes the history of the project, but misses some key details. Contains few spelling or grammatical errors.	Fails to characterizes the history of the project. Contains many spelling or grammatical errors. Or section is not included or addressed	2	5	10	
Proposed Problem	Adequately characterizes all aspects of the problem proposed for the project. Contains no spelling or grammatical errors.	Characterizes some aspects of the problem proposed for the project, but misses some key details. Contains few spelling or grammatical errors.	Fails to characterizes the aspects of the problem proposed for the project. Contains many spelling or grammatical errors. Or section is not included or addressed	2	5	10	
Environmental & Ethical Considerations	Demonstrates a complete understanding of the positive and negative ethical and environmental impact that the project results could have. Contains no spelling or grammatical errors.	Demonstrates a basic understanding of the positive and negative ethical and environmental impact that the project results could have. Contains few spelling or grammatical errors.	Demonstrates a lack of understanding of the positive and negative ethical and environmental impact that the project results could have. Contains many spelling or grammatical errors. Or section is not included or addressed	0		0	N/A
Block Diagrams	All block diagrams easy to follow, clear, properly labeled, and legible. Diagrams are original work, not hand drawn. Contains no spelling or grammatical errors.	Some sections of the block diagrams blurry, jumbled, incorrectly oriented, improperly labeled, or illegible. Diagrams are not original work. Contains few spelling or grammatical errors.	Block diagrams contain multiple issues. Most are blurry, jumbled, incorrectly oriented, improperly labeled, or illegible. Diagrams are not original work. Contains many spelling or grammatical errors.	c	Ω	15	Diagram is clear. Included in ABSTRACT. Should be in SYSTEM OVERVIEW (see criteria next row).
System Overview (refers to and accompanies block diagram)	Adequately summarizes the overall operation of the circuitry used in the project. Contains no spelling or grammatical errors.	briefly summarizes the overall operation of the circuitry used in the project, but misses some key details. Contains few spelling or grammatical errors.	Fails to summarizes the overall operation of the circuitry used in the project. Contains many spelling or grammatical errors. Or section is not included or addressed	r.	4	12	Does not include, accompany or reference block diagram.

Explanation is good, but not integrated with the schematic sections. Break out schematic sections and show here while you are discussing them. References are made to switches (SWL, SW2, & SW3) They are not indicated on the adjacent breadboard layout, or referred to on a specific schematic section. Transistors are described as being used, no reference designators given, or figure locations to provided.	Schematics provided in appendix are clear. change background to white, flip orientation 180, and enlarge.	Layout provided for breadboard orientation	Not addressed. If a section is not used, give a sentence explaining why	Great except how would a user at tech expo be able to test errors in code?	Should be integrated into stage analysis
12	10	10	0	15	15
4	'n	ī.	0	'n	rv
m	74	7	æ	c	ю
Fails to describe the operation of individual stages of circuitry used in the project. Does not refer to specific schematic test points and waveforms. Contains many spelling or grammatical errors. Or section is not included or addressed	Schematic diagrams contain multiple issues. Most are blurry, jumbled, incorrectly oriented, improperly labeled, or illegible. Schematic arrangement is not logical. Some components are grouped by function and labeled. Diagrams are not original work. Contains many spelling or grammatical errors. Or section is not included or addressed	Most layout diagrams are unclear, improperly labeled, or illegible. Most used layers and component layers are Missing. Component arrangement follows no logical pattern. Components are not grouped by function or labeled. Contains many spelling or grammatical errors. Or section is not included or addressed	Fails to specify a specific step by step process for calibrating the project. Does not reference specific schematic test points, desired voltages, or waveforms. Contains many spelling or grammatical errors. Or section is not included or addressed	Fails to specify a specific step by step process for troubleshooting the project. Does not reference specific schematic test points, desired voltages, or waveforms. Contains many spelling or grammatical errors. Or section is not included or addressed	Fails to describes the operation of software and/or firmware associated with the project. Missing or completely unreadable flowcharts. Contains many spelling or grammatical errors. Or section is not included or addressed
briefly describes the operation of individual stages of circuitry used in the project. Some references to specific schematic test points and waveforms. Contains few spelling or grammatical errors.	Some sections of the Schematic diagrams are blurry, jumbled, incorrectly oriented, improperly labeled, or illegible. Schematic arrangement is somewhat logical. Some components are grouped by function and labeled. Contains few spelling or grammatical errors.	Some layout diagrams are clear, properly labeled, and legible. Some used layers and component layers are provided. Some component arrangement is logical and aids in stage analysis. Some components are grouped by function and labeled. Contains few spelling or grammatical errors.	Specifies a basic step by step process for calibrating the project. References some specific schematic test points with desired voltages and waveforms, but misses some key details. Contains few spelling or grammatical errors.	Specifies a basic step by step process for troubleshooting the project. References some specific schematic test points with desired voltages and waveforms, but misses some key details. Contains few spelling or grammatical errors.	Briefly describes the operation of software and/or firmware associated with the project, but misses some key details. Includes overly-complex or unreadable flowcharts for section of code. Contains few spelling or grammatical errors.
Adequately describes the operation of individual stages of circuitry used in the project. Refers to specific schematic test points and waveforms. Contains no spelling or grammatical errors.	All Schematic diagrams are clear, properly labeled, and legible. Schematic arrangement is logical and aids in stage analysis. All components are grouped by function and labeled. Schematics are original work, not hand drawn. Contains no spelling or grammatical errors.	All layout diagrams are clear, properly labeled, and legible. All used layers and component layers are provided. Component arrangement is logical and aids in stage analysis. All components are grouped by function and labeled. Board layers are original work, not hand drawn. Contains no spelling or grammatical errors.	Specifies a specific step by step process for calibrating the project. References specific schematic test points with desired voltages and waveforms. Contains no spelling or grammatical errors.	Specifies a specific step by step process for troubleshooting the project. References specific schematic test points with desired voltages and waveforms. Contains no spelling or grammatical errors.	Adequately describes the operation of software and/or firmware associated with the project. Includes simplified flowcharts for each major section of code. Contains no spelling or grammatical errors.
Stage Analysis (refers to specific and accompanies schematic sections)	Schematics	Component & PCB layout	Calibration Procedure	Troubles hooting Procedure	Software Description

Mechanical drawings are included for some relevant materials and case structures. Drawings have few errors, are mostly properly labeled and legible. Contains few spelling or grammatical errors. A Brief account of the time spent by all or some project team members during the project period. Logs for some of team members are missing information or are formatted differently than the rest of the report document. Contains few spelling or grammatical errors. A bill of materials for the project including component sources with part number and accurate pricing information, with some sections missing or incomplete. Contains few errors. A brief summary of recommendations for any continuation of the project. Justifications for these recommendations are inadequate. Contains few spelling or grammatical errors.								General Comments:
Mechanical drawings are included for some relevant materials and case structures. Drawings have few errors, are mostly properly labeled and legible. Contains few spelling or grammatical errors. A Brief account of the time spent by all or some project team members during the project period. Logs one of team members during the project period. Logs one of team members during the project period. Logs one of team members are missing information of the project period. Logs of team members are missing information of the project including component sources with part number and accurate pricing information, with some sections missing or incomplete. Contains few errors. A brief summary of recommendations for any continuation of the project. Lustifications for these recommendations are inadequate. Contains few spelling or grammatical errors. A brief account of the time spent by all or some project team members during the project period. Logs with formating that matches the rest of the report document. Contains few spelling or grammatical errors. A bill of materials for the project including component sources with part number and accurate pricing information, with some sections missing or incomplete. Contains few errors. A brief account of the time spent by all or some project. Instructions were not followed for this summary of recommendations for any continuation of the project. Lustifications for these recommendations are inadequate. Contains few recommendations of the project. Some of the project and accurate pricing information of the project. Some of the project and accurate pricing or grammatical errors. Or section is not included or addressed are recommendations for these recommendations are inadequate. Contains few errors. A brief account of the project tordinations for any continuation of the project. Some or expensive the project are missing or grammatical errors. A brief account of the project and and ressed are missing or grammatical errors. A part of the project are missing or grammatical errors. A p			Point		Total Points Possible			
Mechanical drawings are included for some relevant materials and case structures. Drawings have few materials and case structures. Drawings have few errors, are mostly properly labeled and legible. Contains few spelling or grammatical errors. Contains few spelling or grammatical errors. Contains few spelling or grammatical errors. A Brief account of the time spent by all or some project team members are missing information or are forment. Contains few spelling or grammatical errors. A bill of materials for the project including component sources with part number and accurate pricing information, with some sections missing or section is not included or addressed incomplete. Contains few errors.		10	5	2	Failure to summarize recommendations for any continuation of the project. Justifications for these recommendations are missing. Contains many spelling or grammatical errors. Or section is not included or addressed		A complete summary of recommendations for any continuation of the project, and justifications for these recommendations. Contains no spelling or grammatical errors.	Conclusion / Recommendations
Mechanical drawings are included for some relevant materials and case structures. Drawings have few errors, are mostly properly labeled and legible. Contains few spelling or grammatical errors. Contains few spelling or grammatical errors. Or section is not included or addressed A Brief account of the time spent by all or some project team members are missing information or are formatted differently than the rest of the report document. Contains few spelling or grammatical errors. Or section is not included or addressed errors.		10	ις	2	An incomplete or mostly incorrect bill of materials for the project. Instructions were not followed for this step or section is not included or addressed	A bill of materials for the project including component sources with part number and accurate pricing information, with some sections missing or incomplete. Contains few errors.	Complete bill of materials for the project including component sources with part number and accurate pricing information. Pricing based on 100 quantity purchases for components. Includes a Labor line item for all team member's billable hours, at \$50 per hour.	Cost Analysis
Mechanical drawings are included for some relevant relevant materials and case structures. Drawings have few materials and case structures. Drawings have few remors, are mostly properly labeled and legible. Contains few spelling or grammatical errors. Mechanical drawings are missing for most of the have many errors and register. 2 0 0 Contains few spelling or grammatical errors. Or section is not included or addressed	Only documented 11 days of actual experimentation for a 5 week period. Where is November 19 -22?	4	4	1	Many log entries are missing or most or all team members, with formatting that matches the rest of the report document. Contains no spelling or grammatical errors. Or section is not included or addressed	A Brief account of the time spent by all or some project team members during the project period. Logs for some of team members are missing information or are formatted differently than the rest of the report document. Contains few spelling or grammatical errors.		Engineering Log
	Not addressed. If a section is not used, give a sentence explaining why	0	0	2	Mechanical drawings are missing for most of the relevant materials and case structures. Drawings have many errors, are improperly labeled, or illegible. Contains many spelling or grammatical errors. Or section is not included or addressed	Mechanical drawings are included for some relevant materials and case structures. Drawings have few errors, are mostly properly labeled and legible. Contains few spelling or grammatical errors.	Mechanical drawings are included for all relevant materials and case structures. Drawings have no errors, are properly labeled, and legible. Drawings are original work, not hand drawn. Contains no spelling or grammatical errors.	Mechanical Drawings
